

On/Off remote setup for wall-mounted water feature

1.

1. The remote receiver is attached to a black bracket with Velcro. This bracket is intended to attach to the back of the hood as shown. In this position the receiver will be just above the copper water distribution unit.

2.

2. Plug the white cord from the wall into the included adapting cord. Then plug the receiver into the other end of the adapting cord.

3.

3. Plug the connecting cord into the outlet on the receiver then into the inlet on the water feature's light bar.

4.

4. Tuck the cords behind the water distribution unit and adjust the location of the receiver to allow for operation.
